MARTIN/MARTIN HIRES TECHNICAL DIRECTOR

Lakewood, CO – Patrick McManus, PhD, PE, SE, has rejoined Martin/Martin Inc. Consulting Engineers as Structural Department technical director. Dr. McManus is an expert in the principles of steel design, seismic design and design/build projects and will also be involved with the firm’s construction services pursuits.

Patrick launched and managed the Martin/Martin Wyoming office in Cheyenne from 2001-2006, prior to directing the engineering/detailing department of Puma Steel for the past four years. From 2006-2008, he also served as Wyoming director at-large for the Design-Build Institute of America where he successfully authored and lobbied for design-build legislation in that state. An adjunct professor at Laramie County Community College, he is an accomplished speaker who is active in many professional organizations, including the American Institute of Steel Construction and American Concrete Institute.

Dr. McManus is experienced in all structural design including all materials and systems. He brings special expertise to Martin/Martin in seismic design and detailing based on research performed during his doctoral studies. He is particularly skilled in longspan truss design, complex steel connection design, and nonlinear computer modeling for advanced stability and progressive collapse analysis. Martin/Martin’s

technical committee, which Mr. McManus leads, produces design guidelines and tools to be used by the firm's structural department. He will spend the balance of his time consulting on complicated and special projects.

Martin/Martin, Inc., with offices in Lakewood and Edwards, Colorado; and in Cheyenne, Wyoming, is a full-service structural and civil engineering firm that has been a leader in the Rocky Mountain region since the 1940s. Visit us on the web at www.martinmartin.com.
