

TRAFFIC

Offering a broader range of transportation services because you asked.

ENGINEERING

Announcing the addition of two new engineers to our Transportation Group.

Aaron S. Heumann, PE, PTOE has worked for 14 years as a traffic engineer conducting a variety of traffic studies, evaluating traffic and transit operations, and contributing to airport designs. Aaron has prepared traffic reports for environmental studies, for large corporate office and retail facilities, and for mixed-use and transit-oriented developments, frequently incorporating parking considerations. In

addition, during his career, Aaron has acquired extensive experience conducting operations analyses, developing signal designs, and preparing signage and striping plans. Aaron can be reached at: 720-544-5325 aheumann@martinmartin.com

Craig A. MacPhee, PE has 7 years of experience as an engineer in land development and traffic design. Throughout his career, Craig has produced a variety of traffic studies, completed numerous signal designs, and conducted complex operations analyses. With a dedication to an understanding of the many components of land development, Craig is able to offer unique solutions that incorporate a

broader perspective beyond traffic operations. Craig can be reached at: 720-544-5323 cmacphee@martinmartin.com

Traffic Engineering Services include:

- Traffic Impact Studies
- Corridor Traffic Studies
- Parking Demand Studies
- Traffic Signal Design
- Site Access and Circulation
- Channelization Plans
- Roundabout Analysis & Design
- Traffic Calming
- Signing and Striping Plans
- Traffic Control Plans
- Transportation Planning

Please contact us with any of your traffic engineering needs.
