### **MARTIN/MARTIN EXPANDS SERVICES TO INCLUDE TRAFFIC ENGINEERING**

Lakewood, CO - Martin/Martin, Inc. Consulting Engineering, a leading civil and structural consulting engineering firm, announced its expansion of services to include Traffic Engineering with the hiring of two new traffic engineers - Aaron S. Heumann, PE, PTOE and Craig A. MacPhee, PE.

Mr. Heumann, PE, PTOE, has worked as a transportation engineer for 14 years and joins Martin/Martin as an Associate. His project experience includes a variety of traffic studies including familiarity with the environmental process, transportation operations, parking studies, and preliminary design efforts including signal design, signage, and striping plans. Part of his transportation engineering experience includes extensive involvement in airport landside operations and light rail transit studies. Mr. Heumann is currently registered as a Professional Engineer in the states of Colorado and Illinois and in Ontario, Canada. He is also certified as a Professional Traffic Operations Engineer.

Mr. MacPhee, PE, has 6 years of experience in traffic, transportation and civil engineering. He has been an analyst and designer on traffic studies and signal operations including signal design and understands the complete development process from both a planning and civil engineering standpoint as a design engineer. He joins Martin/Martin as a Project Engineer and is a licensed engineer in Colorado and Washington.

Martin/Martin's Traffic Engineering Team is now able to offer the following in-house services that previously were provided with the assistance of teaming partners or subconsultants. Our expanded services now include traffic impact studies, corridor traffic studies, parking demand studies, traffic signal design, site access and circulation, channelization plans, roundabout analysis and design, traffic calming, signing and striping plans, traffic control plans, and transportation planning.
